

## System Requirements for Version 2016

The SOFiSTiK products of Version 2016 have been developed, tested and released for the 64-Bit operating systems Windows 7 Professional, Windows 8/ 8.1 and Windows 10.

The products based on the Autodesk® AutoCAD® platform have been developed, tested and released on the current German and English versions of AutoCAD. For the SOFiCAD and SOFiPLUS 2016, this corresponds to AutoCAD 2016 and 2017.

For the Autodesk® Revit® FEA Extension and Rhinoceros® Interface it is Revit 2016 and 2017 resp. Rhinoceros 5 64-Bit. Only SOFiSTiK products that have been installed on these Operating Systems and these platforms will be supported.

Installation and use of SOFiSTiK products might be possible on other Windows Operating Systems but we do not perform QA for that. Similarly, SOFiSTiK Autodesk based products might run on vertical Autodesk products such as AutoCAD Architecture we have no QA for these possible constellations. Should you have any questions, please do not hesitate to get in touch with our helpdesk - we are happy to help.

Product	Version	Operating System	AutoCAD-Version resp. Platform Product
SOFISTiK FEA	2016	Windows 7 Professional, Windows 8 / 8.1, Windows 10 (all 64-Bit)	Interfaces: Revit 2016 and 2017 / Rhinoceros 5 64-Bit
SOFiPLUS-X	2016		(incl. AutoCAD 2016 OEM)
SOFiPLUS	2016		AutoCAD 2016 and 2017
SOFiCAD	2016		AutoCAD 2016 and 2017
SOFiCAD-OEM (German only)	2016		(incl. AutoCAD 2016 OEM)
